

Solar Reflectance Index

SRI - KÖSTER TPO Roofing Membranes

KÖSTER TPO white		
Heat Transfer Coefficient [W/m²K]	Wind Speed [m/s]	SRI Value [-]
5	0 to 2	106
12	2 to 6	105
30	6 to 10	105

Features:

- Consistent material quality throughout (no difference between upper and lower layer)
- Hot air welding provides a homogeneous weld
- Temperature and weather resistant
- Aging and rot resistant
- High flexibility at low temperatures ($\leq -50\text{ °C}$)
- UV-stable
- Root resistant
- Compatible with bitumen
- Compatible with polystyrene
- Compatible with all insulation types
- Resistant to mechanical stress
- Resistant to microorganism
- Environmentally friendly
- Plasticizer-free
- Free of softeners and chlorine
- Safe for health, water, soil, animals, and plants
- Recyclable

The KÖSTER TPO Roofing Membrane in White

KÖSTER TPO Roofing Membranes are made of flexible polyolefins. Glass fleece is embedded into the membrane in order to achieve a high dimensional stability and high mechanical perforation resistance.

Achieving energy efficiency through color: less heat is absorbed from sun exposure onto light surfaces than onto dark surfaces. With the KÖSTER TPO Membrane in white, sunlight is reflected. As a result, the roof temperature is reduced. In addition to lowering the cooling demand for the entire building, a low roof temperature also increases the efficiency of installed photovoltaic systems. In cases where a ventilation system is present, the transportation of cool air throughout the building is also dramatically increased. This leads not only to reduced energy consumption but also has a positive effect on the environment.

KÖSTER TPO Membranes are UV-stable, aging resistant, and resistant against microorganisms. Due to

The KÖSTER BAUCHEMIE AG is a leading global producer of TPO and ECB roofing membranes with over 25 years of experience.

their great compatibility, KÖSTER TPO Membranes are suitable for installation over bitumen roofs and for the installation over EPS insulation materials.

All advantages at a glance:

Does not contain non-molecularly bound plasticizers

Reflects sunlight

Energy-saving
